<b>CURRENT MEDICATIONS:</b>	<b>AT HOME</b>
	<b>AT SCHOOL:</b>
<b>HEALTH PROBLEM(S):</b>	
<b>Problem: Un-accessed port complications</b>	<p><b>Goal:</b> Quick notification to a parent with any potential complication related to an un-accessed port.</p> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> If child is <b>un-accessed</b>, he or she does NOT need a daily check in.</li> <li><input type="checkbox"/> If the child is <b>un-accessed</b> and comes to the health office for illness symptoms or potential site infection symptoms including, swelling, redness or drainage from site, call parent to go home for follow up with provider ASAP.</li> <li><input type="checkbox"/> If child is <b>un-accessed</b> and sustains a hit to the port, please notify parent.</li> </ul>
<b>Problem: Potential for incorrect or missing supplies.</b>	<p><b>Goal:</b> Immediate identification of correct emergency kit supplies present every day and with child at all times.</p> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Wash hands with soap and water or hand sanitizer (if hands not visibly soiled) for 15 seconds with friction. Put on gloves.</li> <li><input type="checkbox"/> Complete daily CVC log when child arrives on site.</li> <li><input type="checkbox"/> Emergency kit should have all supplies, if not, contact parent immediately to get those supplies to the site ASAP. <ul style="list-style-type: none"> <li>✓ Extra sterile Tegaderm</li> <li>✓ Extra sterile 2x2's</li> <li>✓ Plastic clamps</li> <li>✓ Clear surgical tape</li> </ul> </li> </ul>
<b>Problem: Potential for infection or CVC line or site concerns with accessed port.</b>	<p><b>Goal:</b> Complete daily CVC log as soon as child arrives on site.</p> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Wash hands with soap and water or hand sanitizer (if hands not visibly soiled) for 15 seconds with friction. Put on gloves.</li> <li><input type="checkbox"/> Complete daily CVC log when child arrives on site. <ul style="list-style-type: none"> <li>✓ Is emergency kit present with all supplies?</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>✓ Check temperature-call parent if 100.4 or higher, if parent can't be there within 1 hour to pick, call 911.</li> <li>✓ Inspect all caps-if lose, tighten them.</li> <li>✓ Inspect all lines: <ul style="list-style-type: none"> <li>➢ Are clamps clamped? If not, clamp.</li> <li>➢ Are there any signs of leakage or cracking? If so, place plastic clamp between child and potential leak/break and call parent ASAP to change needle or be seen in the emergency room for needle change. If unable to place clamp and line is actively bleeding, <b>call 911</b>.</li> </ul> </li> <li>✓ Inspect insertion site: <ul style="list-style-type: none"> <li>➢ Are there any signs of infection such as redness, swelling or drainage? If so, call parent. If parent is unable to pick up within 1 hour, call 911 as this can progress to septic shock quickly.</li> </ul> </li> <li>✓ Inspect bandage: <ul style="list-style-type: none"> <li>➢ Is the bandage wet or dirty? If so, it needs changed ASAP, call parent.</li> <li>➢ Is the bandage secure, intact and all edges flat down? If not, tape down edges with clear surgical tape and call parents to notify of concerns and interventions.</li> </ul> </li> <li>✓ Swelling: <ul style="list-style-type: none"> <li>➢ Does the student have any swelling of their face, neck or arm? Call parent ASAP. Call 911 if child is having swelling and difficulty breathing.</li> </ul> </li> </ul>
<b>Problem:</b> Potential for Infection at the site of CVC or in the blood stream of <b>accessed</b> port.	<p><b>Goal:</b> Quick identification of potential infection and appropriate interventions initiated.</p> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Wash hands with soap and water or hand sanitizer (if hands not visibly soiled) for 15 seconds with friction. Put on gloves.</li> <li><input type="checkbox"/> Complete daily CVC log.</li> <li><input type="checkbox"/> If no cap is on the line, call parents ASAP to have a needle change or be seen in the emergency room for a needle change. Do not replace the cap. Special cleaning needs to be completed in the Emergency room.</li> <li><input type="checkbox"/> If temperature is 100.4 or higher, contact parent ASAP. If child cannot be picked up within 1 hour, call 911.</li> <li><input type="checkbox"/> If insertion site has any redness, swelling, or draining, contact parent ASAP. If parent cannot pick up within 1 hour, call 911 as this can progress to septic shock quickly.</li> <li><input type="checkbox"/> Call 911 if child is very weak, limp, too weak to stand, pale cool skin</li> </ul>
<b>Problem:</b> Potential for dislodgement or removal of CVC.	<p><b>Goal:</b> Quick identification and intervention if the CVC becomes dislodged or removed.</p> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Wash hands with soap and water or hand sanitizer (if hands not visibly soiled) for 15 seconds with friction. Put on gloves.</li> <li><input type="checkbox"/> If needle is pulled out some and dislodged but NOT completely removed, do NOT push it back in, secure the line with Tegaderm or tape and call parent ASAP for needle change.</li> <li><input type="checkbox"/> If the needle is pulled completely out, be advised that the needle is contaminated, be careful not to accidentally poke yourself or someone else. Dispose of needle in the sharps container and apply a sterile dressing and Tegaderm to site. Call parent ASAP for urgent follow up</li> </ul>
<b>Problem:</b> Potential of CVC placement complications.	<p><b>Goal:</b> Quick identification of potential emergent medical complications.</p> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Call parent if child sustains a hit to their port while access or un-accessed.</li> <li><input type="checkbox"/> Call parent ASAP with any swelling of the chest, face, neck, or arms</li> <li><input type="checkbox"/> Call parent ASAP if cap is off. Do not replace.</li> <li><input type="checkbox"/> Call 911 if: <ul style="list-style-type: none"> <li>✓ Child has a fever of 100.4 or higher and parent can't pick up within 1 hour</li> <li>✓ Child's insertion site has redness, drainage or swelling and parent can't pick up within 1 hour.</li> <li>✓ Child is having any difficulty breathing</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>✓ Child is very weak, limp to weak to stand or has pale, cool skin.</li> <li>✓ CVC line has a leak or break in it and a plastic clamp is not able to be placed and line is actively bleeding.</li> <li>✓ If child has life sustaining medications infusing and line was dislodged or had to be clamped.</li> </ul>
<b>EMERGENCY ACTION PLAN</b>	Shelter in place Evacuation plan

**Personal Care Services/ Medically Necessary Services** (repeat segment if more than one service)**ICD-10 Code:****Specific task:****Scope:****Duration:****Frequency:**

This service is medically necessary through the following dates, not to exceed one year.

**Start Date:****End Date:**

**TO THE PARENT/GUARDIAN:** If \_\_\_\_\_ experiences a change in his/her health condition (such as a change in medication or a hospitalization) please contact the School Nurse Consultant so that this Health Care Plan can be revised, if needed. Parent/guardian signature indicates permission to contact the child's health care provider(s) listed above, as needed. I understand that the School Nurse Consultant may delegate this health care plan to unlicensed school personnel. I give permission for school personnel to carry out this care plan for the Child. I also understand that this information may be shared with necessary school personnel on a need-to-know basis to help ensure the Child's safety and well-being while at school or during school related activities.
